

# Some things are just better together.

Complement your Microsoft Dynamics™ AX and NAV deployments with advanced document processing capabilities from Bottomline.

Featuring seamless integration with both Microsoft Dynamics AX and NAV, Create!form® is the

**Microsoft**  
**GOLD CERTIFIED**  
*Partner*

solution of choice for dynamic document processing, payment generation and integrated digital archive of an organization's most critical ERP-generated documents. When deploying Microsoft Dynamics with Create!form, top implementers can deliver a powerful, cost-effective solution for document automation that reduces the need for expensive technical resources, while increasing profits and ensuring the highest possible levels of customer satisfaction.

Planning to attend the **Microsoft Worldwide Partner Conference, July 7-10** in Houston? Schedule a meeting with Tom Stelten, Bottomline's Microsoft Channel Manager, to learn more about Create!form for Microsoft Dynamics. Email [tstelten@bottomline.com](mailto:tstelten@bottomline.com) to schedule an on-site appointment.

"Create!form belongs in every single AX implementation. When our customers find out the time they can save creating AX custom documents and implementing multi-channel delivery, then Create!form simply sells itself. The 'drag & drop' GUI lets our customers' own IT staff take full control over the entire document design and delivery process. This is an exciting AX-complementary piece of software."
