Bottomline™

Giant Precision Secure Swift Infrastructure by Complying With All CSP Controls

Challenges

- Giant needed support to manage the Swift Customer Security Programme (CSP) and to comply with the change in methodology, which now includes submitting an independent assessment

Solution

- Bottomline Swift Customer Security Programme

  - The trusted relationship with the Bottomline team helped Giant to stay informed of the Swift regulatory changes

  - Bottomline and their independent Swift certified partner minimised the impact of the new methodology on Giant's internal teams by providing a pre-attestation that offered clear and concise recommendations for remediation

Results

- Following remediation, the independent assessment was completed and submitted along with Giant's attestation to ensure compliance with the framework

- Giant have gained a greater understanding across the business of the controls and how they keep their organisation safe and secure

- With changes to the 2022 framework confirmed, Giant have renewed the service with Bottomline and their approved auditor to ensure another seamless process

giant

"Giant Precision turned to Bottomline for support in managing the Swift CSP controls and new methodology. Their service helped us to attest seamlessly and meet all requirements of the framework which will help to protect our Swift infrastructure."

*- Alae Chentouf,
 Assistant Treasury Manager*
