

# Extend the Value of Your ERP with Integrated AP Automation

Many AP departments still rely on outdated, inefficient and paper-based processes. In doing so, they are limiting the AP team's productivity, delaying approvals of invoices and payments, and exposing themselves to unnecessary risk. All of this hurts AP's perceived value to the organization, as just 19% of businesses currently consider their AP function to be exceptionally valuable.

Are you missing opportunities to better secure and streamline your AP processes? With the combination of your ERP's built-in capabilities and proven invoice and payment automation technologies, you can take your AP team's performance to the next level while keeping your system of record up to date and making new processes easy for your team to adopt.

**WITH AP AUTOMATION, YOU CAN...**

## SIMPLIFY AND ACCELERATE PROCESSES

With AP automation, you can **streamline your operations and process invoices nearly 80% faster** by leveraging automated 2-way and 3-way matching capabilities and online exception handling.<sup>1</sup> This reduces the manual input required from AP staff, thereby accelerating both invoice and payment processing and approval cycle times and allowing staff to focus on more strategic activities.

**Do you really want to keep wasting time on inefficient processes?**

## LOWER COSTS BY REMOVING PAPER

Reducing paper received and handled by your AP department has the potential to radically reduce operational costs. In fact, **47% of AP professionals say their top priority is eliminating paper and reducing manual tasks.**<sup>1</sup> AP automation makes that dream a reality.

**Can you afford to waste money manually processing paper-based invoices and payments?**

## IMPROVE VENDOR RELATIONSHIPS

Streamlining AP processes helps you pay your suppliers on time, or if you prefer, early. This has the potential to unlock available early payment discounts, form preferential terms, and **strengthen relationships with regular suppliers.**

**Why miss out on early payment discounts?**

## DISCOVER POSITIVE ROI

Complete the end-to-end invoice-to-payment lifecycle and **generate positive ROI** by converting to secure electronic payments, automating payment processes, and earning cash-back rebates on AP spend. With organizations realizing up to 75% savings by automating payments and invoices, the ROI speaks for itself.

**Why not transform AP into a profit center?**

## INTEGRATE SEAMLESSLY WITH YOUR ERP

The right solution integrates seamlessly with your ERP, resulting in **unprecedented efficiencies, cost-savings, and ease of use**. Whether you opt for a solution that is truly embedded in your ERP or one that allows for real-time synchronization via connectors or APIs, it's critical that your AP automation solution become an easy extension of your accounting system.

**Why not extend the capabilities of your ERP?**

## GAIN VISIBILITY WITH END-TO-END AUTOMATION

For 48% of AP departments, **improving reporting and access to data is a critical priority**, one that can transform visibility for the organization. By storing documents more effectively, increasing transparency in processes, and generally creating smarter systems, better visibility is within reach.

**Why not make visibility into invoices and payments a way of life at your organization?**

## DON'T MISS OUT!
