

Transform for IRIS A2A

A FAST, LOW-RISK PATH TO IRS COMPLIANCE

Meet IRIS Requirements Without the Cost and Complexity

Transform for IRIS A2A gives ERP users a streamlined way to address immediate IRS requirements to comply with A2A for direct tax filing via the IRIS platform through a lightweight deployment, rapid implementation, and ongoing compliance support. It also creates a practical foundation for broader document automation and accounts payable transformation.

The Bottomline IRIS A2A Offer

LOW ANNUAL SUBSCRIPTION

Providing ongoing maintenance and future compliance-related updates

FAST IMPLEMENTATION

A fixed-fee initial implementation engagement, designed to provide a streamlined deployment and accelerate time to value.

DEPLOYMENT MODEL

Lightweight on-premise deployment designed to minimize customer cost, complexity, and infrastructure requirements. Designed for rapid adoption, the solution will typically utilize existing infrastructure, enabling customers to address IRIS requirements without a dedicated hardware project.

What is Transform for IRIS A2A?

Transform for IRIS A2A is a lightweight solution designed to help organizations satisfy IRS requirements while minimizing disruption, infrastructure demands, and implementation effort.

- **Rapid deployment with minimal disruption**
- **Low infrastructure and administration requirements**
- **Ongoing maintenance and compliance-related updates**
- **Affordable entry point for immediate compliance needs**
- **Flexible foundation for future automation initiatives**

A Natural Path to Greater Business Value
