Global Real Estate Firm Achieves Streamlined, End-to-End Payables Automation

"Working with Bottomline has been a truly valuable experience — from resources to help us streamline processes, to their Technical Customer Assistance Center for support, to a smooth upgrade path. They have really been able to support us and our payments strategy as we grow."

- Vice President, Treasury Services

Challenges

- Treasury and AP functions used disparate systems to manage invoices and payments, requiring manual intervention which was time-consuming and costly

Solution

- Bottomline Transform AP for JD Edwards EnterpriseOne and Bottomline WebSeries
  - Capture invoices centrally, to review and approve them from remote locations
  - End-to-end payments automation solution that integrates with ERP system
  - Automates invoice and payments processing
  - Provides centralized visibility and reduces manual processes

Results

- Decreased AP operational costs by $600K annually

- Leveraged ACH to save over $100K annually, earned rebates on AP spend and decreased banking fees

- >50% lower AP processing errors

- Increased visibility across numerous accounts and data sources
