

## Orbit Builds Its Efficiency with a Cloud-Based Solution

*"Rather than having to work to the timeframe of the Accounts Payable team, the authorization can now be done at any time during the day. It has been very good for the workflow."*

- David Harris  
Finance Head of Corporate Support

### Challenges

- On-premise solution caused concern due to reliance on a single computer
- Ensuring compliance with Bacs frequent changes was time-consuming
- Restricted to preparing one file at a time, and each requiring director authorization
- Hardware restricted physical workspace, and the limited authorized users

### Solution

- The PTX Payments and Business Solutions Suite
  - Cloud-based Bacs and Faster Payments solution for Direct Debit collections

### Results

- Implemented secure cloud-based solution for anywhere access and removed reliance on their on-premise hardware
- Complies with latest Bacs security requirements automatically
- Improved operational procedures for efficiency
  - The team now works on multiple payment files with no queuing or delays and then Directors approve specific payment runs from anywhere
- No dedicated hardware saves desk space
- Simple user training requirements and comprehensive reporting
